Nimbus Robotics Annual Report 2025

Nimbus Robotics designs autonomous warehouse robots. In fiscal year 2025 total revenue reached 116.6 million US dollars, up 22 percent from the previous year. The company employs 640 people across offices in Pune, Rotterdam and Austin.

The flagship product is the Nimbus R2, a mobile picking robot with a payload of 25 kilograms. The chief executive officer is Meera Iyer, who founded the company in 2016.

Regional performance

Growth was strongest in one region this year; the chart below breaks down revenue by geography.

Appendix B - Service and Warranty

Every Nimbus R2 unit ships with a 36-month limited warranty covering drive motors and the lidar module.

Battery packs are covered for 18 months or 4000 charge cycles, whichever comes first.
